PERSONAL DISCOMFORT JOURNAL

Recorded 9/12/2026

Updated 9/12/2026

Example: A stiff neck after sleep and tennis

Neck · 2 marked locations

ACTIVITY Tennis	FEELING Stiff
DURATION Since yesterday	INTENSITY Not rated

In your words

My left upper trap and high left neck feel stiff after sleeping on my side and stomach. I noticed it again while serving in tennis. Looking down slowly and turning left brings it on.

Current 3D view · Muscles and skeleton · Z-Anatomy / BodyParts3D

Visible pins: 1, 2. All pin notes are listed below.

Reference anatomy, not a measurement of your body. Left and right use the model's own perspective. Pins identify selected surfaces, not the cause of discomfort. Colors show reported intensity, not tissue damage.

Notes by location

1 Neck

Model left · Surface pin

Stiff across the left upper trap after serving.

Reference surface: Transverse part of trapezius muscle

2 Neck

Model left · Surface pin

High left neck when looking down or turning left.

Reference surface: Ascending part of trapezius muscle

Video resources to discuss

These independent demonstrations are educational. Read the publisher's precautions before following them; a link does not establish that an exercise is suitable for you.
